

Cochise County Jail Provider Note

PATIENT: Kristina Hills
DATE OF BIRTH: 09/17/1976
DATE: 03/12/2019
HISTORIAN: Inmate/Medical records
VISIT TYPE: Lump in groin

HPI: This I/P requested to be seen for complaints of lump in groin that is tender. States she had PID in November and this is how it began. Reviewed records which show she was treated prophylactically for Gonorrhea and Chlamydia, but cultures returned negative. This is explained to patient today. She denies fever, chills, N/V, vaginal discharge, vaginal itching or burning. She did have a UTI last time this occurred. States she took all the medications prescribed for that. I/P states CQCH said she had a hernia, CVMC evaluated the next day and their CT reported no hernia. Unsure if ingrown hair as I/P stated, "I shaved my pubic area."

PAST MEDICAL/SURGICAL HISTORY: Hep C, TBI, osteomyelitis in spine, "treated for PID" in November, RA

FAMILY HISTORY: Not in file

SOCIAL HISTORY: History of IVDU Heroin, Marijuana. Positive for tobacco use. Denies ETOH

CURRENT MEDICATIONS: None

ALLERGIES: NKMA
